Environmental Policy

As an information technology solutions and services provider, given the context of our organization and the environment condition, our policy is to protect the environment by reducing the impact that our activities have on it.

Therefore we, the INFO WORLD team, are committed to meet our environmental objectives and targets set by the top management, by:

- **educating staff in order to prevent pollution and preserve natural resources,**
- **fulfilling all legal obligations and commitments on environmental protection,**
- **continuously improving our environmental management system based on ISO 14001 standard principles and requirements.**
